Degrees of Hearing Loss & The Impact on Life

People with hearing loss often downplay the severity of their condition, saying things like, "My hearing loss isn't that bad" or "I can hear, but I can't understand." It is important to understand the different degrees of hearing loss and how they can affect our daily lives. Let's explore this further.

**Hearing Loss & the Impact
on Life**

Types of Hearing Loss

People can experience three types of hearing loss, which can be permanent or reversible. Our latest article delves into the different types of hearing loss that people may experience and the available treatment options for each.

Audiologist Spotlight:
Dr. Brittney Carter, Clintonville

"I started my career as a researcher, learning how healthy hearing supports a healthy mind. As an audiologist, I see every day how truly life-changing hearing aids or cochlear implants can be for people with hearing loss. It's an absolute joy to help people to better communicate with their loved ones and to see my patients better engage with the sounds that mean the most to them."

— Brittney Carter, Au.D., Ph.D.
